SANDING MACHINES AND ACCESSORIES

Columbus

The Columbus simply and effectively removes all unwanted subfloor materials

This machine will mill, grind and sand your floor surface while creating a minimum of dust, helping to maintain a healthier working environment.

The strong design and well-built construction of the Columbus ensures long machine life and good reliability.

By raising and lowering the lever, the machine glides across the surface in semicircles. All types of plaster, screed, asphalt and adhesive along with small surface irregularities can be removed from the subfloor with ease.

The wide range of sanding plates make the Columbus suitable for all types of floor surfaces. The machine is unsurpassed in saving time and effort, with sanding plates, discs and brushes changeable in seconds.

The 3-gear planetary transmission is designed to cope with the toughest tasks.

TRIVODISC

Developing the Trivo-Disc we have consulted the best experts: our customers

Because this first class three disc sanding plate not only makes parquet flooring shine but also fulfils the highest expectations of parquet and floor layers.

The Trivo-Disc is quiet running with powerful dust extraction. Self-propelled and quickly mounted onto the Columbus models 145 SH (1500W) , 155 and Speedtronic.

Special features

- Thanks to the self-propelled Velcro sanding discs the removal rate is very effective.
The results are effectively efficient.
- Perforated Velcro sanding discs and perforated abrasives allow collection of sanding dust and optimal heat dissipation.
- Large plate apertures allow optimal suction capacity.
- Self-propelled sanding discs with low-noise toothed belt technology.
- The speed of the Velcro sanding discs can be adjusted according to surface and task (Speedtronic).
- Included in the delivery: Kevlar sealing sleeve for Multi-Vac.

The result

One revolution of the disc equals 4 revolutions of the sanding plates. The result: 600 rpm – the ideal speed for the perfect finishing touch.

Structured, natural parquet surfaces are enjoying great popularity! ...we show you how it works.

Fine sanding with structural effect
...transforms every parquet flooring into a lively surface..

The unique FIBREPAD has been developed for fine sanding of parquet flooring and for deep cleaning of surfaces like wood, stone and metal.

Its extremely long life span means that the pad doesn't need to be changed in the middle of the work process. The advantage is an even polishing result.

The FIBREPAD achieves through its shape and fibre structure a very high sanding performance, excellent dust extraction and finally a spotless and scratch-free surface, ready to be oiled or varnished.

FIBREPAD Ø 150 for TRIVO-DISC with velcro backing

Excellent results can be achieved with the Velcro backed FIBREPAD Ø150 together with the TRIVO-DISC and Columbus machine.

The FIBREPAD Ø150 is also perfectly suited for edge sanding and can be mounted onto most edge sanders.

Three pads are required for fitting on the TRIVO-DISC.

Order-No. 488 811 000

The most important features at a glance:

- no scratches when sanding
- steady sanding performance – uniform polishing results
- high surface quality
- sands faster than conventional abrasives
- extremely long life span

(not suitable for intermediate varnish sanding)

The advantage for your customers:

the treated surface has a higher quality and is less delicate

Disc brush SIC Ø 160 mm for TRIVO-DISC with velcro backing

Grinding machine BS 330

1 machine - 2 applications
as surface and edge grinding machine

The BS-330 is a robust grinding machine, which finds its application in both, surface and edge treatment.

The powerful motor generates enormous grinding performance on small and medium surfaces.

In addition, the machine can be converted without tools and in seconds to a perfectly matched edging machine.

The grinding head can be adjusted with a clever locking system in both directions. Thus, both the right and the left side of the machine, can be used for edge treatment, simplifying grinding work in the edge region enormously.

Our proven, high-quality diamond grinding tools can be used with this machine.

COSMO II STRIPPER

A powerful stripper for small and medium-sized areas.

The COSMO Stripper works on wooden or concrete surfaces and will remove virtually any substance adhering to the floor.

The handle and wheel adjustments allow different settings of the blade to fit the floor, while keeping the handle in a proper operating position.

An ideal addition to the Power Stripper and MASTER MOBIL.

- adjustable cutting angle
- adjustable handle
- machine runs virtually silent with reduced vibration (62DB)
- big wheels ensure comfort and efficiency
- simple and fast disassembly for storage or transport in the boot of a car

MASTER MOBIL II

The powerful motor combined with the revised HYDRAULIC-DIRECT-DRIVE system ensures high output with an extremely low noise level.

The MASTER-MOBII II is self-propelled (forward and reverse) with unparalleled performance due to its high torque German designed electric motor.

Adjustable guide handle in six positions allows ergonomic operation depending on body size or preferred working position.

Weights can be easily removed for transportation, reducing the net weight of the machine.

TECHNICAL SPECIFICATION	
Power supply	230V or 120V
Motor power	0.75 kW (1HP)
Weight	75 kg (174 lbs)
incl. front weight	105 kg (205 lbs)

Optional Accessories for Master II

JUNIOR *Ride-on* Powerful like the big machines!

The new compact version of the ride-on stripper with the best price-performance ratio

The forward leaning construction puts the centre of gravitation on the tool itself and allows for optimum stripping performance, normally only achieved by machines twice the size.

TECHNICAL SPECIFICATION

Order-No. 111 416 000

NEW

PATENT PENDING

SPECIAL FEATURES

Working speed up to 37m/min
With a working speed of up to 37m/min the stripping performance is increased, especially when removing elastic or textile coverings.

Weight of 340 or 420 kg
Weight is essential for optimum stripping performance and traction but weight restrictions are also to be observed for example soil bearing capacity, load capacity of lifts and loading capacity of transport vehicles.

“soft touch“ operating handles
The new “soft touch” operating handles allow easy access and fatigue-free work over many hours maintaining an ergonomic seating position. Even less experienced users are able to use the JUNIOR Ride-On without extensive training or experience.

Zero turn radius
Maximum manoeuvrability is achieved via the hydraulic rear-wheel drive together with the front swivel castor. This is especially useful when turning at the end of a room. The zero turn radius increases productivity clearly.

Moisture Meter CMEX II

The advanced moisture meter - now available with a variety of accessories!

NON-DESTRUCTIVE MEASUREMENT IN SECONDS

The CMEX II is a non-destructive meter for measuring moisture content instantly in concrete floors and floor screeds. Incorporating an optional plug-in port for a pin-type wood probe and an RH probe (Hygro-i), this is the ideal all-in-one instrument for the flooring professional.

SPECIAL FEATURES

- very precise measurements within seconds
- easy to use, easy to read backlit LCD display
- 3 different operating modes:
 - + moisture content determination of concrete and screed
 - + relative humidity and temperature measurement with dew point
 - + measurement of %-moisture content in wood
- 4 various integrated scales:
 - + concrete/cement screed
 - + CM Equivalent (concrete/cement screed)
 - + gypsum/gypsum plaster
 - + reference scale (e.g. comparison measurements on anhydrite)
- measurement - hold function

TECHNICAL SPECIFICATION	
Size:	155 x 85 x 38 mm (6 1/8 x 3 3/8 x 1 1/2")
Weight:	280g
Construction:	ABS Body
Power:	9 Volt PP3

Order No.	110 371 100

Moisture Indicator VI-D4

non-destructive method of accurately determining moisture content in concrete and cement without using pins.

Sensor type: spring pins
screen memory

- 7 available scales:
- Concrete (0-6% H2O)
 - Cement screed (0-6% H2O)
 - Cement screed (0-4% CM)
 - Anhydrite screed (0-3.5% H2O)
 - Anhydrite screed (0-1.9% CM)
 - Caisson scale (0.3-15.3m)
 - Relative scale (0-100%)

The measured value can be called up by pressing the tester lightly

The test device works on the principle of capacitive stray field measurement and allows testing of the moisture conditions in the near-surface region.
